SETTING A NEW
TREND IN WALL DECOR

LIVING
creatively

3-dimensional | **easy DIY** | **lightweight** | **natural** plant fibres

A high quality, artistic and durable three-dimensional wall finish that is environmentally friendly. **3dboard** can be utilised to create stand alone feature walls or a more subtle and subdued atmosphere of elegance and refinement throughout the home or business.

In 3d's world

Tonglanhai is a supplier of three dimensional wall panels with its own independent brand and intellectual property rights. Our head office is located in the heart of Beijing, China.

3d board is a revolutionary new eco-friendly wall decoration unique to the marketplace, with several invention patents and more than 40 copyrights and design patents.

3d board is unique and aesthetic, inspired by tessellations to create dimension and depth in virtually any space. Shaped through pure physical technics, each board is incredibly durable and lightweight. The material is eco-friendly and sustainable and can absorb heat and sound. On top of that, the boards can be painted in any color, it also can be fire-proof if the customer requires. With easy-installment and versatile application, 3d board is the perfect wall decoration.

The main features for **3d board** are as follows:

1. Elegant in style---3D design
2. Eco-friendly=raw material + manufacture process + installation & application + recyclable

Right now, we have four sizes:

300x300mm, 500x500mm, 625x800mm, and 1000x1000mm, with more than 40 unique designs, three series, and 13 colors to choose. Each year, we promote more than 10 new designs from designers all around the world, expanding our ever-growing portfolio. Our average lead time is approximately 7 days for one container. Through intelligently leveraging our edge with the OEM and ODM Capability, we will provide you with the best quality product at the most competitive prices.

3d board is currently widely used for interior residential decoration and commercial wall decoration. Presently, 3d board is exporting to more than 45 countries and areas, gaining recognition from all our clients for our top-notch service and quality.

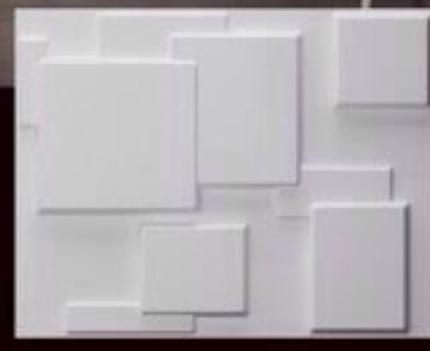

We have two different products characterized by color and material: **3d board G2I** and **3d board G2II**, more detailed information please check the below parts.

In early 2010, we developed the 3d board G2II on the basis of 3d board G2I . It is made of composite material, and does not need a coat of paint since the material is already colored from a swatch of 13 unique colors that we offer.

Features for 3d board G2II

1. Made of composite material, eco-friendly
2. 3D design, simple and aesthetic
3. Colored, washable, easy to clean, easy-installation

home decoration

- home theatres
- lounge rooms
- hallways
- bedrooms
- ceilings

public facilities

- airline lounges
- hospital lounges
- VIP lounges
- retail stores
- window displays

Installation Steps

1. Make sure the surface be smooth, flat, dry and clean.
2. Plan your design. Measure and mark vertically and horizontally the area of installation.
3. Start working from the middle of the wall to both sides.
4. Apply the all-purpose adhesive glue (Titebond is recommend) on wall and panels, follow the instructions indicated on the glue packaging.
5. Press the panel to ensure all its corners and edges adjoin the surface, avoid strong pressure on the relief parts.
6. Fill the gaps with paintable caulk (Titebond is recommend.)
7. Brush or spray the wall by oil/water based Paint.

TOOLS:

Tape Measuring, Gradienter, wallpaper knife, brush, glue, paint, paintable caulking.
